

汽车风扇调速器多绕组同步生产线

Car Heatsink Fan Coil Winding Production Line
with Multi Windings Work Synchronously

Features

产品特点

- ✓ 此产品由3个不同绕组完成，因客户对生产效率要求高，且需同步完成；
This products is completed by 3 different windings, due to high demands for efficiency and synchronism;
- ✓ 机器设计为3个绕组分别同时运行。操作员仅需将磁片放入上料台，机器会自动依工序传送，直至绕制完成自动下料；
Machine is designed with 3 windings running at the same time. Operator just need to put the magnet core onto the loading area, machine will automatically transform step by step till completed and unloading;
- ✓ 机器自动上料至W1进行第一绕组挂脚绕线断线工序，完成后自动传送至W2, W3结束后下料。
Machine Auto-loads to W1 and starts to hang terminal,winding and wire breaking, passing to W2 and W3 and cycle again till unloading.

特殊说明 Remark

此产品起始结尾针脚必须断线头朝上（如下图所示）

This coil requires start and end terminal to be upright(showing as picture below)
